We anticipate being able to open to schools for day programmes after the Easter Holidays. Glachbeg will provide an exciting context to deliver all areas of the curriculum. It will not be a "bolt on" to the curriculum. Programmes are designed with you to suit your needs. More information to follow soon. There will be programmed viewing opportunities, to give you an idea about what we can do to help you. If you want to talk to us in the meantime please do so. Bob is an experienced teacher who ran a similar centre for an Education Authority until 2002.

The under floor heating pipes are now covered over with concrete- ready for the floor covering .

Question: How is the concrete going to affect the way the building heats up and keeps its heat ?

The sewerage processing plant arrives. It will be buried given a pumped air supply and will feed into a filter mound to make sure water that leaves it is safe and clean.

Question: Find out how microbes play an important part in sewerage treatment ?

This is the beginning of the filter mound. It consists of sand, gravel and pipes to spread the discharge from the sewerage works out

**ANTICIPATED OPENING**

**APRIL 11<sup>th</sup>**

**School programmes offered  
from May**

Supported by Highland Council
