Glachbeg Croft – will be opening to provide education programmes in the Spring of 2005. Glachbeg Croft is not just an environmental education centre. Its use is limited only by imagination.

Why this bulletin? We hope that this information will be of use to some teachers for curriculum work. Information is provided with the purpose of supporting the Technology 5- 14 curriculum, and touches upon all three strands. We are happy to work up particular items in order to meet particular curriculum needs . The bulletins can be used “live” as they come or can be kept and copied for future use. Site visits will also be possible at times.

We found a new brick layer (After the last one didn't turn up.) This one is actually a stone mason. See his work [www.stonezone.fsnet.co.uk](http://www.stonezone.fsnet.co.uk) . Stephen says stone is living and concrete blocks are dead. What did he mean?

We can now see the outline of the building

Concrete pads for the base of the frame are drilled, steel rods glued in – to bind the concrete that will be poured into the tubes to the pad

Holes are dug to insert drain pipes through the wall. The next stage will see all of the inside of the wall area filled in with material
