Glachbeg Croft – will be opening to provide education programmes in the Spring of 2005. Glachbeg Croft is not just an environmental education centre. Its use is limited only by imagination.

Why this bulletin? We hope that this information will be of use to some teachers for curriculum work. Information is provided with the purpose of supporting the Technology 5- 14 curriculum, and touches upon all three strands. We are happy to work up particular items in order to meet particular curriculum needs . The bulletins can be used “live” as they come or can be kept and copied for future use. Site visits will also be possible at times.

We now had to build up the ground level inside the walls- ready to lay the concrete on top.

The area around the building is levelled to allow access for the concrete mixer and other machinery

Some materials were dug up from adjacent to the building- this will later become the pond. Other material was bought in from a local quarry.

Question. Why do we have to pay aggregate tax ?

The site itself has to be signposted and fenced to warn people that construction sites are dangerous. Question. Why?

Anybody on site has to wear steel toe capped boots, protective hats and high visibility clothing. Question. Why?
